### Who we are

Our website address is: <http://localhost/wp2>.

### What personal data we collect and why we collect it

#### Comments

When visitors leave comments on the site we collect the data shown in the comments form, and also the visitor's IP address and browser user agent string to help spam detection.

An anonymized string created from your email address (also called a hash) may be provided to the Gravatar service to see if you are using it. The Gravatar service privacy policy is available here: <https://automattic.com/privacy/>. After approval of your comment, your profile picture is visible to the public in the context of your comment.

Name

The name is how it appears on your site.

Slug

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent Category

None

Categories, unlike tags, can have a hierarchy. You might have a Jazz category, and under that have children categories for Bebop and Big Band. Totally optional.

Description

The description is not prominent by default; however, some themes may show it.

Before you cry over spilt mail...

Getting spammed? You have protection.

Spammers target everything, your contact forms aren't an exception. Before you get spammed, protect your contact forms with the powerful anti-spam features Contact Form 7 provides.

Contact Form 7 supports spam-filtering with Akismet. Intelligent reCAPTCHA blocks annoying spambots. Plus, using comment blacklist, you can block messages containing specified keywords or those sent from specified IP addresses.

Before you cry over spilt mail...

Contact Form 7 doesn't store submitted messages anywhere. Therefore, you may lose important messages forever if your mail server has issues or you make a mistake in mail configuration.

Install a message storage plugin before this happens to you. Flamingo saves all messages through contact forms into the database. Flamingo is a free WordPress plugin created by the same author as Contact Form 7.
